Make as many 3 digit numbers as you can, using the 4 digits given below. Each 3 digit number should be greater than 390. You can repeat digits in a number.

There are more than 25 such numbers that can be made!
How many can you think of?

(2) (9) (3) (6)

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____
11. _____
12. _____
13. _____
14. _____
15. _____
16. _____
17. _____
18. _____
19. _____
20. _____

The missing digits in each sum are 1, 2 and 3. Write them in the correct places to make the given number.

a) ☐ ☐ × ☐ = 36

b) ☐ ☐ × ☐ = 63

c) ☐ ☐ × ☐ = 23

d) ☐ ☐ × ☐ = 32

e) ☐ ☐ × ☐ = 26

f) ☐ ☐ × ☐ = 62

The scale shows the two sides in perfect balance.Tick the side that will be heavier if :

1. 
I take one ball away.

2. 
I add a ball to the tray with bananas.

3. 
I add a watermelon on the tray with balls and a ball on the side of the watermelon.
